ALL SAINTS CHURCH

KBI UK Flexipave was installed at All Saints Church in Shiptonthorpe, York, creating safer and more accessible pathways throughout the churchyard. Unveiled on 9 July, the sustainable surface improved wheelchair access while complementing the historic surroundings. Previously, the inaccessible paths had presented significant safety and accessibility challenges. Flexipave was chosen as the ideal solution to upgrade the existing pathways, enhance the appearance of the grounds and provide an environmentally friendly surface.

TESTIMONIAL

“Things were getting desperate; our church ‘path’ was dangerous and difficult. After rain, it became so muddy that even the steadiest of people could slip. We have already received favourable comments from congregation members and villagers. The finished product looks good and is so much easier for everyone to negotiate. We can now access our church whatever the weather.”

Freda Bailey, All Saints Church, Shiptonthorpe

HIGHLY POROUS
Allows water to drain naturally through the surface, reducing flooding and standing water.

FULLY SUDS COMPLIANT
Meets Sustainable Urban Drainage Systems requirements, supporting environmentally responsible and effective surface water management.

LOW MAINTENANCE
Durable and long-lasting, requiring minimal upkeep while retaining its performance and appearance.

MULTIPLE COLOURS
Available in a range of finishes, to suit different design schemes and aesthetic requirements.

ECO - FRIENDLY
The project recycled 267 vehicle tyres, preventing 5,874kg of CO_2 emissions from burning.

SLIP - RESISTANT SURFACE
Provides excellent grip in wet and dry conditions, improving year-round pedestrian safety and accessibility.

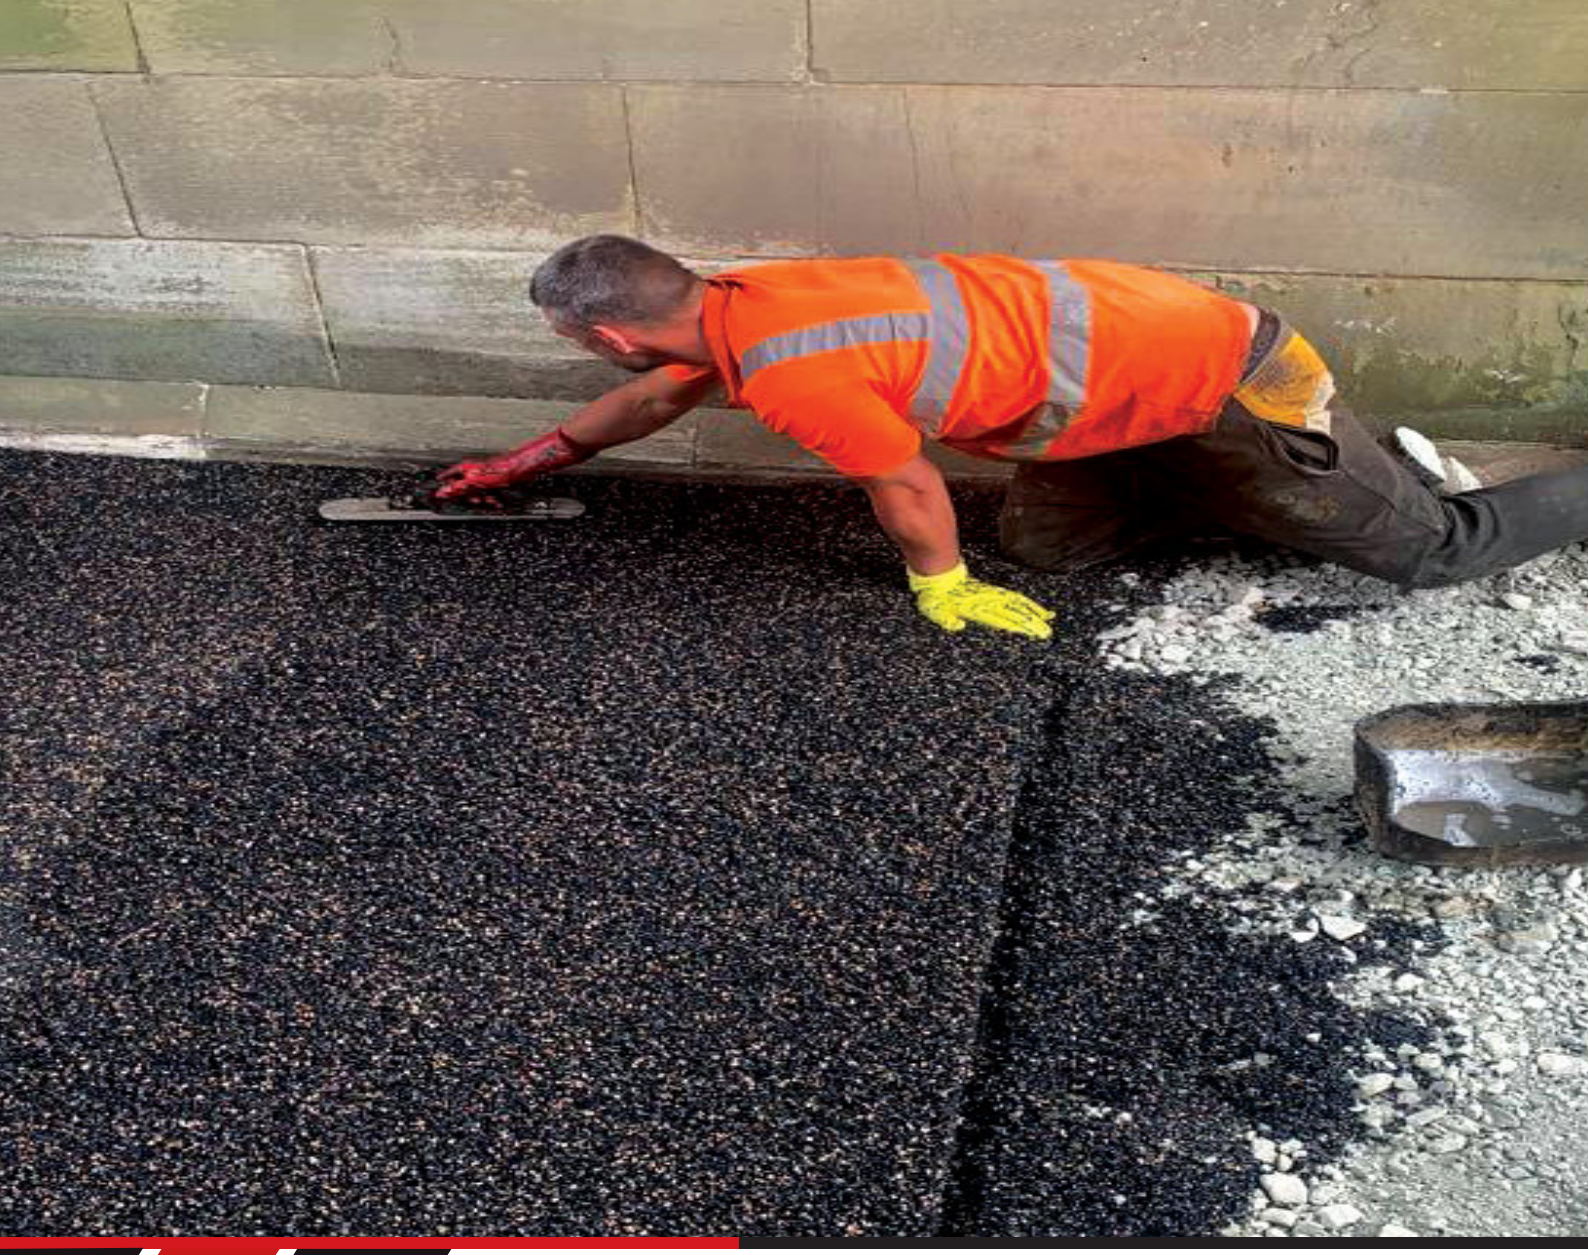

Surface Area: 100m² of Flexipave installed

Product: Flexipave HD1500

Tyres Used: 267 vehicle tyres

CO_2 Saved: 5,874kg of CO_2 emissions
