CBEEBIES LAND HOTEL AT ALTON TOWERS RESORT

KBI UK was appointed to carry out remedial works in front of the CBeebies Land Hotel, with the aim of restoring the appearance originally envisioned when the hotel opened in 2017. Having previously installed Springback safety surfacing at the site in 2022, KBI UK was delighted to return and deliver a completely new look. The existing surfacing was removed, and the groundworks and sub-base were re-prepared to ensure effective permeability. KBI UK then installed a Meadow Flexistone blend alongside six bespoke Colourbound finishes, creating a refreshed and distinctive appearance.

flexiglass SPECIALIST SURFACING

Flexiglass is a decorative surfacing product developed by KBI UK as part of its porous paving range. It combines polished decorative glass with proprietary binder technology similar to that used in Flexipave systems Designed for use within permeable schemes, Flexiglass enhances visual impact through coloured detailing, veins and feature areas while remaining fully compatible with porous surfaces. It provides a durable, customised finish without compromising performance or permeability.

1. HIGHLY DECORATIVE Allows for vibrant, custom designs including patterns, logos, emblems and bespoke colour blends, enhancing the visual appeal of pathways and surfacing areas.

2. LOW-MAINTENANCE The durable polyurethane binder system resists wear and fading, reducing the need for frequent repairs or upkeep.

3. BESPOKE-COLOUR BLENDS Colour pigments can be tailored to specific requirements, including exact RAL colours, allowing complete creative flexibility.

4. FULLY PERMEABLE (SUDS COMPLIANT) The system supports sustainable drainage systems (SuDS) by allowing water to pass through, helping to manage surface run-off and prevent flooding.
